

RUPESH NARENDRA BORSE

B.E. - Information Technology

Ph: +91-9765072652

Email: rupeshborse2005@gmail.com

Pune, Maharashtra, India - 412105

LinkedIn: <https://www.linkedin.com/in/rupesh-borse-a52432283>

KEY EXPERTISE

Java SQL C++ Python Data Structures & Algorithms (DSA) Object-Oriented Programming (OOP)
Operating Systems (OS) Computer Networks (CN) Database Management Systems (DBMS) SSD (Solid State Drive) basics
Test Automatio NVMe CLI Docker Maven Spring boot

EDUCATION

Dr. D. Y. Patil Institute of Technology

2023 - 2027

B.E. - Information Technology | CGPA: 8.43 / 10

Bhairavnath Secondary and Higher Secondary College, Pune

2023

12th | MSBSHSE | Percentage: 76 / 100

Gayatri English Medium School, Pune

2021

10th | MSBSHSE | Percentage: 88.20 / 100

AWARDS AND SCHOLARSHIPS

- o HackerRank: Achieved 5-star Gold Badge in Data Structures & Algorithms.
- o College Merit: Secured 1st rank in Mathematics & Statistics in HSC at college level.
- o LeetCode: Earned 50 Days Badge for consistent problem solving.
- o TechNavinya 2026 – Project Exhibition: Secured 1st Position (Department Level) for innovative project development and presentation.
- o Competitive Programming: Solved 200+ Coding problems across LeetCode, HackerRank, and GeeksforGeeks covering Data Structures, Algorithms, and Problem Solving.

PROJECTS

AI-Powered Meeting Notes Generator

Key Skills: Python FastAPI NLP React.js JSON Git GitHub

Project Link: <https://github.com/RupeshBorse17/AI-Powered-Meeting-Notes-Generator>

Developed a full-stack AI-powered meeting notes generator using React.js and FastAPI. Implemented NLP techniques including Tokenization, POS Tagging, Named Entity Recognition (NER), TF-IDF, and TextRank to generate executive summaries, action items, decisions, risks, follow-up tasks, and keywords from meeting transcripts. Designed a modular backend with REST APIs

Full Stack E-Commerce Platform

Key Skills: Java Spring Boot react js hibernate git git hub

Project Link: https://github.com/RupeshBorse17/Shop_Ease-E-commerce-

Developed a full-stack e-commerce web application using Spring Boot, React.js, PostgreSQL, and REST APIs to manage products and customer orders. Designed and implemented secure RESTful APIs for product and order management with complete CRUD functionality using Spring Data JPA and Hibernate. Integrated the React.js frontend with backend services using Axios to enable seamless data exchange. Designed normalized PostgreSQL database schemas for efficient data storage and retrieval. Implemented product search, image upload, and responsive user interfaces to improve usability. Tested and validated REST APIs using Postman and managed project dependencies with Maven. Used Git and GitHub for version control and collaborative development. This project strengthened my understanding of full-stack development, REST API design, database management, and backend architecture.
